

— CONFERENCE ROOM TECHNOLOGY · SELF-SERVICE

ROOMS THAT RUN THEMSELVES.

Conductor turns any conference room into a self-guiding space. One scan delivers step-by-step instructions, instant support, and real usage data — **no app, no help-desk ticket, no “how do I connect?”**

<p>1</p> <p>SCAN</p> <p>Point a phone at the placard or on-screen splash. No app, no login.</p>	<p>2</p> <p>GUIDE</p> <p>Step-by-step instructions for the exact hardware in that room.</p>	<p>3</p> <p>SUPPORT</p> <p>One tap routes the user to the right help — room already identified.</p>	<p>4</p> <p>MEASURE</p> <p>Every scan is data: utilization, support trends, adoption.</p>
---	---	---	---

WHAT CONDUCTOR DELIVERS

- ✓ **INSTANT INSTRUCTIONS**
Room-specific, first-try guidance. Update once — every placard and splash screen reflects it.
- ✓ **ONE-TAP SUPPORT**
Connect users to the right help with the room, device, and issue already in context.
- ✓ **USAGE TRACKING & REPORTING**
See room utilization, support trends, and adoption — the data to justify AV spend.
- ✓ **WORKS WITH YOUR EXISTING AV**
Cisco, Mersive, Logitech, Crestron, Zoom, Teams. Hardware-agnostic — no rip-and-replace.

THE CHALLENGE

- 01 Meetings start late while people fight the AV.
- 02 The help desk drowns in repeat “how do I connect?” tickets.
- 03 No data on which rooms get used or where support is needed.

WHERE IT FITS

- CORPORATE AV
- HEALTHCARE
- HIGHER ED
- HOSPITALITY

HOW IT'S DEPLOYED

- PLACARD**
On-table or wall-mounted QR.
- SPLASH SCREEN**
On the room's existing display.

WHY TAURUS

Built by the team that builds the rooms. Conductor isn't a generic QR app — it's made by Taurus Technologies, AV & technology integrators who design, install, and support conference rooms, healthcare spaces, and command centers every day.
